A. Academic Qualifications

Courses	Description
Financial Management	This course discusses three important decisions faced by financial managers, namely: investment decisions (capital budgeting), funding decisions (capital structure), and working capital decisions (working capital). Financial Managers must be able to conduct an appropriate analysis, using appropriate methods, so that the decisions taken are consistent with the company's goals, which is to maximize the value of the company.
Money Market and Capital Market	The course explain and obtain basic knowledge about financial markets, namely: financial markets and capital markets include: institutional, market characteristics, financial market instruments, and the role of government as a regulator in general.
Financial Statement Analysis	The topics covered in this course include discussion on issues during business growth or decline, cash management, risk, investment and valuation, and overall framework for assessing firm's competitiveness. This course is intended to discuss business problems at managerial and strategic levels, not involving technical details of financial statements reading and preparation.
